ZSK SPRINT 6:

Single Head Compact Embroidery Machine
1200 Stitches Per Minute Daily Production Speed
12 Needle Head Option

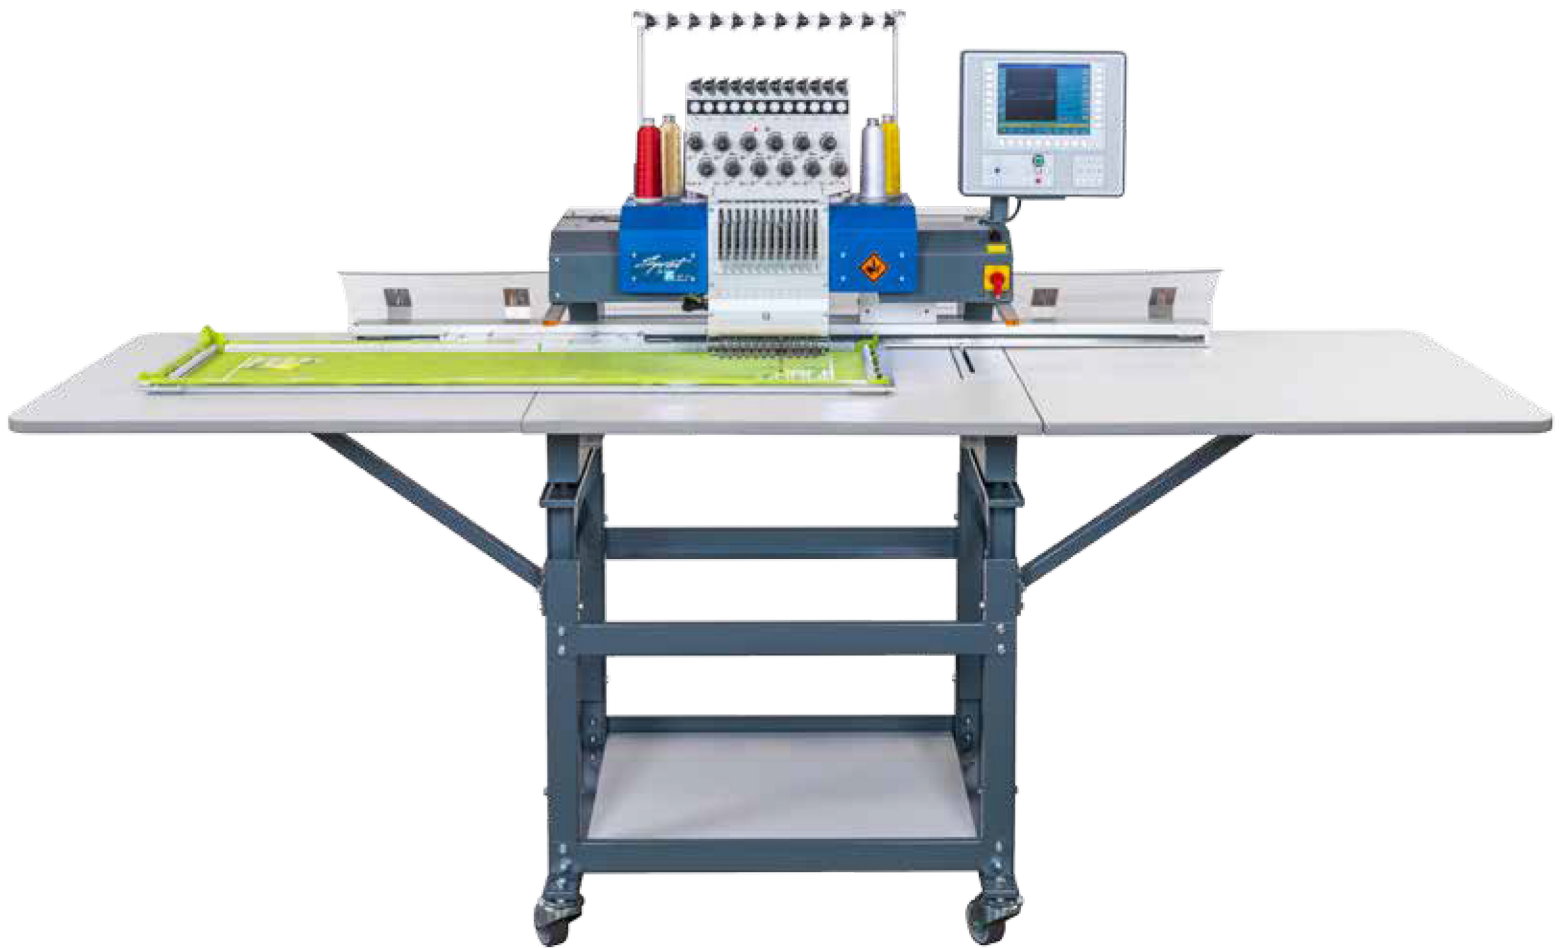

ADAPTABLE
VERSATILE
FORWARD THINKING

Small but mighty, the Sprint 6 Compact Embroidery Machine by ZSK offers the most advanced sewing system in the world. The ZSK equipment provides the efficiency and quality that you can only expect from German craftsmanship.

In addition to the superior components and outstanding build style, the Sprint was the first machine on the market with the newest tubular arm technology. Unlike all other

embroidery machine designs, the picker in the bobbin area is now re-engineered so that the system works without the picker in the front.

As for longevity, the Sprint will outlast any other equipment. ZSK is the only manufacturer that guarantees control panel upgrades for at least 10 years. There is no need to buy new equipment to have the latest control panel. When the market advances, so do you - exchange only technology, not machinery.
